## SUPPORT

WPF provided funds, £4,000 to purchase one installation solar array for water purification.

Solar power to OFF Grid remote villages creates power for a multitude of uses. Critically it enables the pumping and purification of water from nearby rivers for the community.

It also paves the way for tele-medical facilities for the delivery of remote medical advice and school use. Also providing charging units for cordless tools to develop sustainable work, battery units on electric vehicles for the transport of people, mobile pumping units and cargo.

One installation solar array capable of powering a 5hp pump costs in the region of £4,000.

CHARITABLE  
TRUST

The mission was to install a demonstration unit at Shanti Van and solar energy units in 4 other villages. This demonstration pilot project will be in Shanti Van, located in coastal Maharashtra and 4 other villages in the Konkan region of Maharashtra. The Shanti Van centre will serve as a demonstration and training centre where farmers can learn to install and maintain their own equipment.
